Volume 11 Marriage Records

Volume 11 is the sixth volume if marriage records which included information about the age, occupation, place of birth, residence and parents of the bride and groom.

Previous volumes rarely made reference to age nor parents unless the person marrying was under age and needed parental consent. When a minor married there may have been a marriage consent filed with the Court. Even then, the parent's names were not always recorded in the official records and in may cases, the marriage consents may not have survived. (the age to marry without parental consent varied over the years)

The change in law to include information about the bride and groom is a great asset to genealogists and researchers. Every effort was made to include all information for your benefit.

In this book each record of a marriage is listed alphabetically by the groom's last name. The bride's index is in the back of the book and references her to the groom and marriage number of the original volume. (this helps identify the exact marriage, in cases of a bride or groom marrying more than once during this time frame.)

In instances where you find a location listed ending ., it is a situation where there is not enough room in the field to allow the complete city, county or township and state information, the state information is not listed but is usually Ohio or is able to be defined by the balance of the information listed.

The original volumes are currently, in 2003, located in the Records Center, Mount Vernon, Ohio
